

JAS-ANZ

AN ISO 9001:2015 CERTIFIED COMPANY

BARODA FIBER & INSULATION

About Company

We at **Baroda Fiber & Insulation** are engaged in manufacturing, supplying and exporting a comprehensive range of electrical insulation components. Our offered range of products incorporates PCB Products, FRP Epoxy Rod, Laminated Wood, FRP Sheets, POM Components, etc. We make use of best quality raw material to manufacture our offered range of products. These products are commonly used in the Electrical, Power Generation & Distribution, Solar Power, Wind Power, Induction Furnace and Construction Industries etc.

We have a sophisticated infrastructure facility that aids us performing all the business tasks swiftly. Our facility is divided into various sections, to ensure the smooth execution of all the processes we have manufacturing facility, quality control, administrative, packaging and logistic departments. To handle the responsibilities of these sections, we have appointed a team of expertise professionals. Our quality controllers carefully test the entire range of production, to ensure its flawlessness in quality. Our company has been a client oriented organization since its inception as clients are the most important elements of our business. Over the period of time, by following a client centric approach we have created a large clientele in the industry. We respect our clients for supporting us throughout our journey that has encouraged us to offer new and effective range of products on continuous basis.

Infrastructure

- ➔ 6000 Sq.ft. Industrial Shade
- ➔ CNC Router Machine, 10ft X 5ft
- ➔ Press Machine 100 Ton, 8ft X 4ft
- ➔ Power Press Machine
- ➔ Pultrusion Machine
- ➔ Multi Cutter Ripsaw Machine
- ➔ Heavy Duty Cutter Machine
- ➔ Edge Rounde Machine, 8 Nos
- ➔ Jigsaw Machine
- ➔ Surface Planner Machine
- ➔ Threaded Machine
- ➔ Drill Machine
- ➔ Tapping Machine
- ➔ Benso Machine
- ➔ Grinding Machine
- ➔ Dust Collector Machine
- ➔ Leath Machine

Quality Assurance

Our Valuable Clients

PULTRUSION ITEMS

FRP Rods

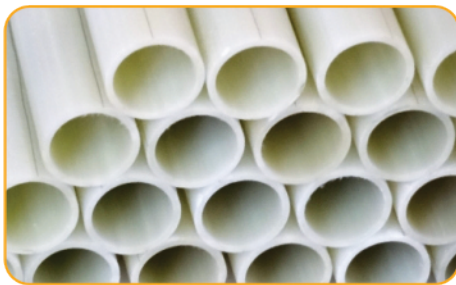

We offer tubes solid rods which are corrosion resistant to road salt and are widely used as brake tubing and enhances life-expectancy of automotive vehicles. These tubes solid rods are fabricated by using qualitative raw material and are suitable for various electrical insulation's. Our tubes solid rods are available in different specifications in terms of size, thickness and dimension. The entire range is extensively used in many industries.

FRP Dog Bones

Owing to our vast experience, we have been successful in catering to the requirements of our esteemed clients by offering quality Pultruded Dog Bones. These products are manufactured using high quality material. Furthermore, we make sure that our range is packed in premium quality material to ensure its safe transit at customers' destination.

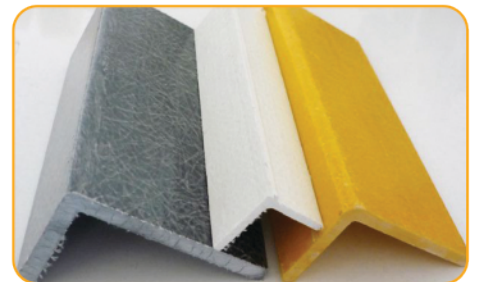

FRP Tube

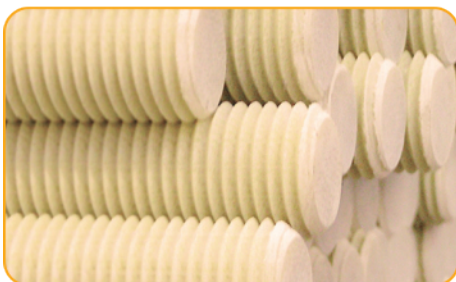

We are manufacturing, supplying, and exporting an exclusive range of FRP Tubes. All these offered products are manufactured under the close supervision of highly experienced professionals. Besides, our logistics personnel make sure that the consignments are timely delivered at clients' destination using easy shipment modes.

FRP Corner

Our investment in the well-structured warehouse has paid off well. We have successfully installed up-to-the-minute warehouse management software to keep the entire lot in a safe and organized manner. Keeping pace with the contemporary market trends, we ensure on-time and safe delivery of the orders. We offer long durable FRP Corner Angles in wide gamut of colors like red, green, blue, yellow etc.

Threaded Rods

Striving hard to deliver the exceptional product range that includes FRP Insulation Rods, we are a prominent Supplier in the market. We are working in close coordination with the team members and management; they make every endeavor to keep the products piled up safely in our capacious warehouse. By this, we make deliveries in the committed time span. The offered FRP Insulation Rods are available in various diameters ranging from 5mm to 25mm.

Customer Pultrusion

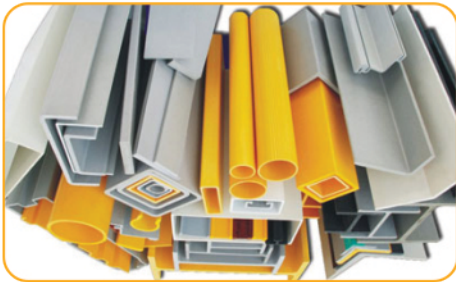

Glastic Composites pultrudes a wide variety of fiberglass reinforced plastic tubes, profiles and solid rods. Custom parts range from rugged outdoor construction materials to high-strength thin-wall parts for the transportation industry.

FRP Channels

We are counted amongst reckoned names in the industry, committed towards offering a wide gamut of FRP Channel. The provided channel is manufactured using quality assured fiber reinforced plastic with the assistance of innovative methodology in sync with defined industry norms and standards. Additionally, we are offering this channel in several sizes as per the requirements of the renowned patrons. To eradicate any kind of flaw, this channel is carefully checked on diverse measures of quality.

Fiber Glass Angles & Components

We are an acclaimed name engaged in offering our precious clients a superior quality range of Fiberglass Angles. The offered angles are manufactured using high grade raw material and the latest technology by our vendors' professionals. So as to ensure the quality, these angles are tested on different parameters by our quality examiners. Keeping in mind various needs of our clients, we provide these angles in different sizes and specifications.

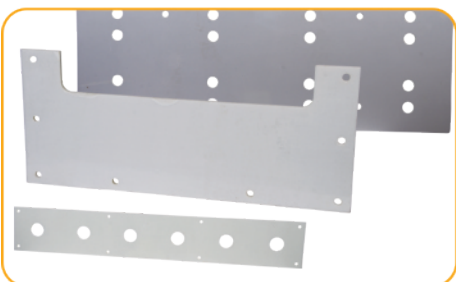

EPOXY FIBER SHEET

To continue our good will in clients' consideration, we are successfully engaged in trading and supplying a comprehensive range of Fiber Glass Sheets. It is strictly tested on various parameters of quality to ensure its matchless quality and durability. Our sheets are manufactured using optimum quality fiber glass and contemporary techniques at vendors' end in tandem with set industry norms. In addition to this, our clients can avail it at market leading prices with no hassle.

Fiber Glass sheets

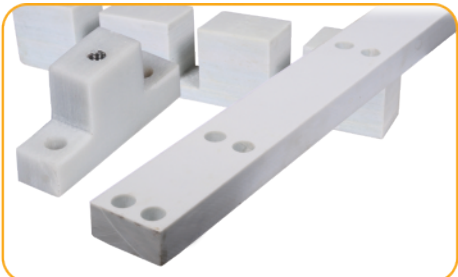

Link & Terminal Boards

We manufacture Terminal Boards of various sizes for transformers and switchgear. The terminal boards are made from compression moulded FRP sheets / epoxy sheets. The terminal boards are manufactured as per the drawings given by the customer.

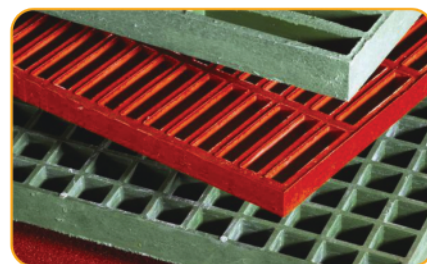

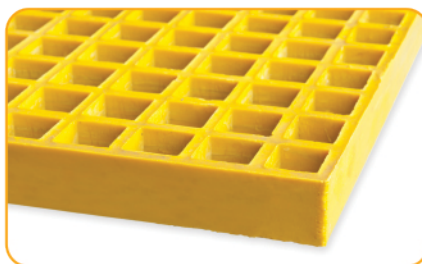

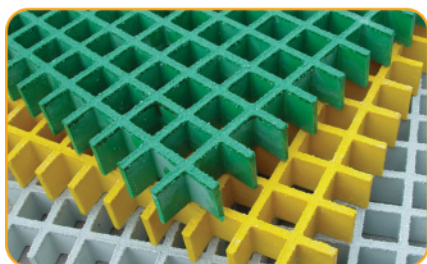

Fiber Glass Blocks

In order to satisfy the diverse preferences of customers, we are offering superior quality FRP Blocks. The offered blocks are acknowledged by our clients for its sturdiness and durable finish standards. Our provided blocks are manufactured under the supervision of adroit workforce making use of premium grade FRP material in synchronization with set industry standards and norms. These blocks are used in highly corrosive environments.

FRP GRATING

FRP Grate Benefits : Corrosion resistant. High strength-to-weight ratio. Long service life. Fire retardant. Slip & impact resistant. Non-conductive. Superior ergonomics. Easy to fabricate. Easy to install. Attractive, clean finish. Resins available for Pultruded Grating: Fire retardant isophalic polyester, isophalic polyester, vinyl ester, fire retardant vinyl ester, and phenolic. Our standard grating is ISO-Polyester, which provides superior performance in corrosive environments.

POLYESTER SHEET

We are acknowledged as the most demanded manufacturer, exporter and supplier of Fibre Glass Sheets that is available in different sizes and designs at par with the demands of clients. The offered grade nema G10 is manufactured using the best quality raw material and sophisticated technology in compliance with industry norms. Our provided grade nema G10 is examined on various quality measures.

Fibre Glass Sheets

Fiber Glass Angles & Components

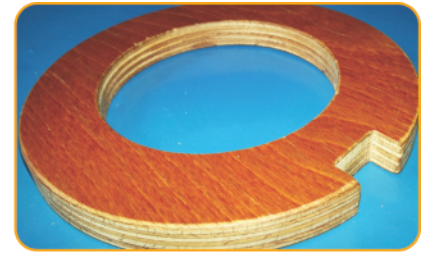

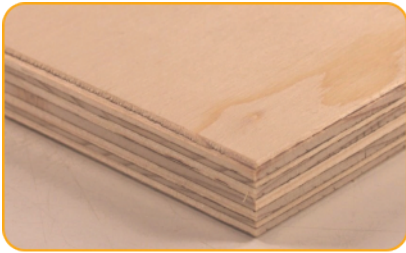

We are indulged in offering FRP Corner Angle to our clients. We use high grade raw material in the manufacturing process. Thus, our range of products is of premium quality that sets unmatched standards in the market. These FRP Corner Angles are hugely demanded in the industry for their durability and corrosion resistance.

PRE COMPRESSED PRESS BOARD

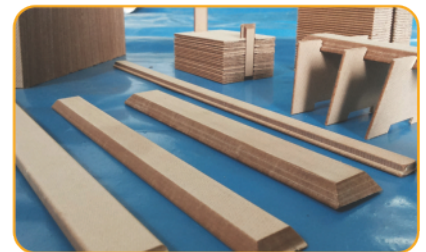

Densified Laminated Wood Sheet for Transformer Insulation Components

We are amongst leading companies that manufacture, supply and export a wide range of Densified Laminated wood. This range of products are strictly checked on different guidelines to assure high quality standards. We make these product by joining the beech veneers. Owing to their salient features such as good slippage, abrasion resistance and resistance to high and low temperature, our products find wide application in several industries. We provide them at very economical prices.

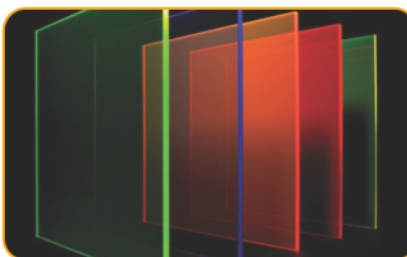

Pre Compressed Board & Components (PCB)

Pressboard is a special product based on the purest cellulose, extracted from long-fibered coniferous trees. These are formed into a non-woven material without using any additional binding agents and then pressed. The high chemical purity means pressboard is an extremely suitable insulation material for electrical machines (impregnated with resin), capacitors (impregnated with oil or resin) and particularly oil-filled transformers. The material properties allow classification in insulation class A (105° C) and are manufactured in accordance with the IEC standard. Depending on the thickness of the material, a distinction is made between sheet and rolled press board.

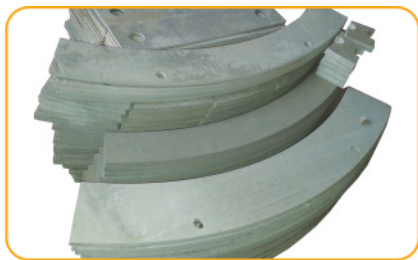

ACRYLIC SHEETS & COMPONENTS

We are one of the well-known suppliers of Acrylic Sheets in the market. We offer a wide range of acrylic sheets that are available in cast grade and extruded forms to suit the varied requirements of the industry. Our Acrylic Sheets are lightweight, transparent and are extremely resistant to chemicals and heat. We offer Acrylic Sheets in various shapes, sizes and are open to customization according to the customer as well.

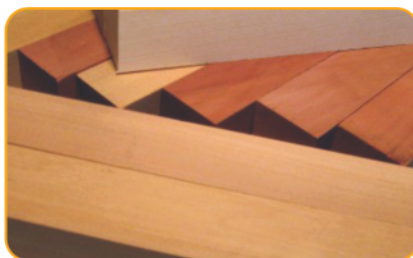

SYNDANIO SHEET AND COMPONENTS (NA)

Syndanio sheets and parts made from it are used for thermal as well as electrical insulation. These sheets are available in various sizes from 3 mm to 75 mm, and are mainly used in foundries and furnaces. The application in foundries are top plate and support blocks of high frequency furnace heating element supports and spares, oven and furnace linings as a core moulding and drying plate in foundries, flask liners, ladle covers, steel ladders, and insulating truck beds carrying billets. These sheets can be cut and supplies at various sizes as per the customer requirement.

HALDIWOOD COMPONENTS FOR TRANSFORMER INSULATION

We bring forth a unique range of Haldi Wood for our clients, which is used in various electrical components as an insulator. We have manufactured these products using supreme quality wood and craftsmanship. The entire raw material is procured from trusted market vendors after judging their credibility in the industry.

DENSIFIED WOOD

Baroda Fiber is a leading supplier for superior quality Electrical Insulating Densified Wood. Procured from established vendors, these products are made of premium quality raw materials in accordance with International Standards IEC/DIN. Our products enjoy great reputation in the market for their durability, optimum performance and cost effectiveness. With the help of ample stock in our warehouse, we assure Cost effective and time stipulated delivery of the products.
